

- All applicants applying for a new address must complete a 911 Addressing Application. Read and fill out the form with as much information as possible. The standard processing time for addressing is 7-10 working days.
- Please do not submit the addressing application form until you have installed the driveway/approach you intend to use for primary access to the property. If the approach is moved after addressing occurs, a new 911 address will need to be assigned.
- All splits of land must submit a Parcel ID Number (contact Powell Co. PVA at (606-663-4184) or a legible copy of the plat with the addressing application.
- Subdivisions must have street names (approved by the addressing coordinator) before plats may be filed. Addressing of subdivisions may take up to 4 weeks depending on size and other variables.
- If you have any questions, please contact the 911 Addressing Office.
